Coating Layers

Layer	Function	Advantage
1	Clear acrylic glazing layer	Increase brightness and bonding strength, to prevent rain leak to the lower layer and granular structure
2	Colorful stone layer	Can off light to protect the glass roof, reducing rain water and prevent decorative substance
3	Acrylic adhesive bonding layer	Structure to adhere the upper and down layer; to protect the underlying structure
4	Protection layer	To protect aluminum zinc layer and reduce the green stone substance of the lower layer
5	Aluminum zinc layer	High heat reflective rate and strongly corrosion resistant; It can increase lifespan and energy saving.
6	Zinc greenstone	High strength zinc stone coating, which can protect the aluminum zinc layer of the roof
7	Aluminum zinc layer	High heat reflective rate and strongly corrosion resistant; It can increase lifespan and energy saving.
8	Protection layer	To protect aluminum zinc layer
